LITERARY AND HISTORICAL SOCIETY OF QUEBEC.

REPORT OF THE COUNCIL,

FOR THE

YEAR ENDING DECEMBER 31ST, 1871.

THE period has come for the Council to lay before the Society an account of their stewardship.

An uninterrupted and increasing prosperity has marked the past year.

The Stated Meetings have been numerous, and have furnished occasions for treating many subjects of paramount interest. Seven of the papers read have been included in the "*Transactions*."

The Board has been enabled to carry out a long-deferred determination, and now announces, with pleasure, the completion and publication of a carefully-classified Catalogue of the contents of the Library.

Whilst adding to the collection of works several of the most valuable volumes of the day, this Council has not lost sight of one of the chief objects of its charter—the publication of Historical documents calculated to further Canadian History. Two important MSS. have recently been printed under the auspices of the Society. The first is the Journal kept by General James Murray of the war operations in Canada in 1760. This document was procured from the London Archives through the exertions of Dr. W. J. Anderson, Vice-President. The second relates to the early history of the Colony, from 1682 to 1712—a French MS. of 82 pages, selected amongst our own archives, and recommended by the historian Frs. Parkman, and published under the supervision of the President. These two volumes—a

not inconsiderable addition to Canadian History—bring up to twelve* the number of MSS. published by the Society since 1866.

The department of Numismatics has not been overlooked: in addition to a large number of old and rare coins, the Council calls attention to the collection of beautifully-executed United States medals recently purchased.

Our Museum of Canadian Birds is rapidly increasing, especially by gifts; and with a moderate annual appropriation it will soon attain large dimensions.

The Council is also happy to state that the hopes expressed by the President at the beginning of the year, touching a collection of Canadian Woods, are in a fair way to be realized. For the Woods of Commerce, 60 in number, the Society is indebted to the Provincial Government. A selection of Canadian and Foreign Woods has also been presented by Dr. H. H. Miles, D.C.L., LL.D., one of the members; and so soon as the Society will be prepared to furnish a suitable *locale* for the reception of the same, Dr. Miles has signified his intention of presenting numerous designs of art and manufacture calculated to enlarge the sphere of usefulness of this institution. This naturally forces on our view a topic more than once canvassed of late—the insufficiency of room and accommodation for our ever-increasing Library and Museum.

* The following is a list of the titles of the Manuscripts of the early History of Canada published under the auspices of the Society since 1866, viz.:

- “Campaign of Louisbourg, 1750-58.”—By Chevalier Johnstone.
- “Journal of the Expedition up the River St. Lawrence, 1759.”—From the “New York Mercury,” December, 1759.
- “Colonel Malcolm Fraser's Journal of the Siege, 1759.”
- “Journal du Siège de Québec en 1759.”—M. Jean Claude Panet.
- “Dialogues of the Dead: Montcalm and Wolfe.”—Chevalier Johnstone.
- “Campaign of 1760 in Canada.”—Chevalier Johnstone.
- “Invasion of Canada, 1775.”—Lieutenant-Colonel Caldwell.
- “Histoire du Montréal.”
- “Voyage D'Iberville.”
- “L'Armée Américaine, lors de l'Invasion du Canada en 1775-6.”—Par J. B. Badaux.
- “Journal of the Siege of Quebec, from September 18th, 1759, to May 25th, 1760.”—By General James Murray.
- “Recueil de ce qui s'est passé en Canada au sujet de la Guerre, tant des Anglais que des Iroquois, depuis l'année 1682 jusqu'en 1712.”

There is a subject, within the scope of this Society, which, during the past year, has attracted much attention amongst its members—the urgency of a Government Office of Historical Records. This matter having been taken up by the Government, all that remained to this Society to do was to watch their proceedings, and to add their own to the many and earnest representations made on this head by all the friends of Canadian History. Our “*Transactions*” contain, on this point, an able address of Dr. Miles, and an eloquent letter from Mr. Parkman, the gifted historian.

The number of Associate Members has now attained the unprecedented figure of 268, and at every meeting new members are seeking election.

The arrangement entered into with Mr. Geo. Mathison as the custodian of the Rooms, Assistant-Secretary, and Sub-librarian, continues in force, as well as the lease with the Morrin College.

MR. PARKMAN'S LETTER.

“PORTLAND, 22nd June, 1871.

“J. M. LEMOINE, *Esq.*, *President of the Quebec Literary and Historical Society, Quebec:*

“MY DEAR SIR,—Having been occupied at intervals for many years in researches connected with the early history of Canada, and being, perhaps, as conversant as anybody with the difficulties that beset the investigation, I beg to call your attention to the importance of some combined action to accomplish a task to which individual effort is unequal: without this, Canadian history cannot be well written.

“The materials of your singularly interesting annals are scattered through various archives and libraries in Europe and on this continent. They are often in confusion—what is valuable and what is worthless being mixed pell-mell; the hand-writing is often half legible. These papers, or a judicious selection from them, copied in a legible hand, bound in chronological order, and preserved in a place of deposit, where they could be consulted by the student, under proper restrictions, would throw a flood of new light on Canadian history.

“An excellent beginning has already been made, in the second and third series of Paris documents now deposited in the Library at Ottawa. These, together with the first series, consisting of copies of the French documents of the Brodhead collection of New-York, are invaluable as far as they go. They are, however, an imperfect and partial collection. A heap of French documents, from about the year 1732-4 to the year 1763, a most interesting period of your history, remains uncopied in the archives of Paris, subject to the accidents of revolution, from which, last spring, they narrowly escaped. Their loss would leave a gap which could never be filled. Besides these, there are many documents of an earlier period, which have never been brought to America.

“Strange as it may seem, the States of New-York and Massachusetts began the work of collecting the materials of Canadian history from the archives of Paris and London. Mr. Brodhead, under a State commission,

labored to collect all the French-Canadian papers which had a bearing, direct or indirect, on the history of New-York; Mr. Poore was employed to the same effect on the part of Massachusetts; and the results in both cases have been very valuable. It cannot be supposed that the New Dominion will leave in a state of half-completion a task in which she has so deep an interest.

"I hope that the ardent interest which I have always taken in the history of your country will be a sufficient apology for suggestions which might otherwise seem intrusive.

"With great regard, yours very truly, (Signed,) F. PARKMAN."

At a numerously-attended meeting of the members of the *Literary and Historical Society of Quebec*, held on the 11th of October instant, the following resolution was unanimously adopted :

"Moved by Hy. S. Scott, Esq., and seconded by W. Marsden, Esq., M.D., Vice-Presidents :

"That the *Literary and Historical Society of Quebec* have noticed with much satisfaction the action taken by the Dominion Parliament, at the instance of Sir A. T. Galt, K.C.B., on the Petition presented by the Society and others, praying that measures be adopted to preserve the Historical and Public Archives of the Dominion by the creation of an Office of Public Records; and this Society earnestly hopes that the deep interest recently manifested for the cause of Canadian history by the eminent historian Francis Parkman, as evidenced in his eloquent letter addressed to the President of this Institution, will also tend to promote such a useful and national project as the one herein alluded to.

"That a copy of this Resolution be transmitted to the Hon. C. Dunkin, Minister of Agriculture and Statistics, to whose Department this subject was referred by a Committee of the House of Commons.

"(Signed,) J. M. LEMOINE, *President*.

REPORT OF THE ACTING LIBRARIAN,

FOR THE

YEAR ENDING DECEMBER 31ST, 1871.

At the last annual meeting, Mr. James Douglas was elected Librarian, the Society being aware that he intended to be some time absent from the Dominion. Dr. Anderson undertook to discharge the duties of the office during the absence of Mr. Douglas, which was unexpectedly protracted till near the close of the year: it has, therefore, devolved on the Acting Librarian to prepare the Report.

At the annual meeting in January, 1869, Mr. Faucher de St. Maurice was elected Librarian, and received instructions from the Council to prepare a Catalogue of the Library for printing. Business called Mr. Faucher to Paris; and the Council, being unwilling to delay, requested Mr. LeMoine and Dr. Anderson to make the required arrangements. Accordingly, they secured the services of a French gentleman, a M. Maire, who at once set to work, and faithfully and diligently prepared the manuscript to the best of his ability. On the return of Mr. Faucher, it was placed in his hands for printing; but, from unavoidable causes, no steps were taken till Mr. Faucher's retirement from office.

At the commencement of the present year, Mr. Faucher, at the request of Dr. Anderson, then Acting Librarian, furnished the manuscript to the printers as they required it, when it was discovered that, from Mr. Maire's very imperfect knowledge of the English language and his peculiar style of writing, the printers had the greatest difficulty in deciphering it. The

labour, till they became somewhat familiar with the manuscript, was at least doubled, as was also that of the Acting Librarian in correcting the proofs. In the month of November, during Dr. Anderson's absence, the proofs were read by Messrs. LeMoine and Faucher. When the printing was approaching completion, it was discovered that the index had been mislaid or lost. A remedy, however, was at once supplied by Mr. Faucher, who undertook to prepare a new one; and the Acting Librarian has now the satisfaction of reporting, that, after so many annoying delays, the Society will in a short time be in possession of a very complete Catalogue.

During the past year, many and valuable additions have been made to the Library, both by purchase and donations. Among the donations, is a series of Ordnance Maps and Surveys, presented by Colonel Hamilton, Royal Engineers, Commandant.

The Library has been well frequented, and a very large number of books, on every subject, was taken home for family use; but on looking over the Librarian's Register, it will be found that those most in demand were of the lighter literature, particularly the bound serials; and this leads the Acting Librarian to remark, that while he would be sorry to diminish in any way the purchase of those works of science and art to which the Council has hitherto paid much attention, and which add so much to the value of the Library, he would strongly recommend the introduction of the standard works of the great authors, including those of Scott, Bulwer, James Dickens, Trollope, Kingsley, and D'Israeli,—library editions of which are now published at a cheap rate. He would urge on the Council the immediate appropriation of \$100 towards this object.

About one hundred and fifty copies of our "*Transactions*" have been mailed to corresponding societies and gentlemen who have in various ways placed the Society under obligation. On the other hand, many valuable publications have been received in return, which will be found on the Library table. It is to be regretted that we were unable to meet numerous applications, owing to all the publications sought having been burnt in the disastrous fires which consumed our Library.

A very fine Barometer, procured through the agency of Captain Ashe, is now in the Library, and its state at noon is every day noted by Mr.

B *

Mathison. In mentioning Mr. Mathison's name, the Acting Librarian takes the opportunity of certifying to his thorough efficiency, and trusts that the Council will this year continue the *bonus* which they voted to him last year.

The Acting Librarian, with the sanction of the Council, caused many of the books, which had fallen into a state of dilapidation, to be repaired, which was done at a comparatively small cost, but has added much to the appearance of the books on the shelves and to their actual value. He recommends that his successor be authorized to continue this work.

He would fail in his duty if he did not point out to the notice of the Society that certain parties, in defiance of the rules of the Library, have been in the habit of handing books which they have taken out, to other members, instead of returning them to the Librarian, which leads to much confusion in the Register, and is unjust to other members whose names have been entered for the books, and who are entitled to them in the order of rotation. Another crying evil, and one to which a remedy must be applied, is the practice, by some members, of retaining, from carelessness or otherwise, the books they have taken out, for a period long exceeding the regulations; and this is too often the case in reference to the newest books, which, of course, are most sought after.

The question of greater accommodation for the Library has been more than once under consideration by the Council; and during the past year, negotiations of an informal character have been carried on between Dr. Cook, Principal of Morrin College, and several members of the Council. Though nothing has as yet sprung from these negotiations, it is gratifying to know that all the propositions of Dr. Cook were of the most liberal and friendly character. The Acting Librarian recommends that the Council should, without delay, appoint a Committee to deal with the matter.

Acting Librarian.

REPORT OF THE CURATOR OF THE MUSEUM, FOR THE YEAR ENDING DECEMBER 31ST, 1871.

The under-signed, in rendering an account of his trust, has the pleasure to mention that real progress has been accomplished in the Department of Natural History during the last twelve months. Several important additions were made in different sections, and even new ones have been created. But before enumerating any of those acquisitions, the undersigned deems it a part of his duty to state that, under the enlightened guidance of the President of this Society, the Curator of the Museum found his task comparatively easy; in fact, he found he could not do better than complete the measures suggested by his laborious predecessor, J. M. LeMoine, Esquire.

The first important addition made was a collection of South-American birds' skins, procured in August last. They have since been mounted in good style by a professional taxidermist of this city, and are now exhibited in a separate glass case.

The munificence of Mrs. James Gibb is also a most pleasing theme to dwell upon. In execution of the wishes of her late husband, this generous lady presented the Society with some thirty odd specimens of French and Italian birds, well mounted; also, a dozen of Audubon's rare and celebrated engravings of American birds—life size,—the whole accompanied with curiosities of art, medals, &c., of which a detailed list is herewith annexed.

No addition has been made to the collection of eggs; but your Society will be happy to hear that, owing to the President's efforts, the undersigned was enabled to begin the formation of a no less and important section—he

alludes to the collection of Canadian, West India, and other Foreign Woods. For the Canadian specimens actually exhibited, thanks are due to Dr. H. H. Miles and to the Honourable Commissioner of Public Works.

The undersigned begs to notice, also, the beautiful collection of United States Government Bronze Medals recently purchased. These bronzes were executed at the Washington Mint to commemorate important national events and keep alive the memory of the great men of the United States. A glance at the list herewith annexed shews that these Medals are classified in four distinct categories—Army, Navy, Presidential, and Sole National Medals. No doubt, antiquarians and others visiting our Museum will be delighted to see this precious collection, becoming year after year more and more valuable, as the original dies are always destroyed once the medal is struck.

Several other additions, of minor importance, but entitling them as well the generous donators to the sincere thanks of your Society, have been made to the Museum, a list of which is also annexed to this Report.

The undersigned believes that the effective services rendered by Mr. Mathison, the keeper of the rooms, deserve also a special mention in this Report.

Before surrendering his trust into better hands, the undersigned begs to add, in conclusion, that the department of Natural History is evidently in the way of rapid progress: every section is increasing almost every year.

But could not more attention be devoted to the collection of Woods? The undersigned hopes that our wealthy lumber-merchants will give their hearty support to this subject, and render the collection well worthy of your Society and of the Quebec lumber trade.

The undersigned has great pleasure in again returning his sincere thanks to the President and Board of Directors for the co-operation he at all times experienced during his term of office.

The whole respectfully submitted.

J. F. BELLEAU,
Curator of the Museum.

Quebec, January 10th, 1872.

LIST OF SPECIMENS OF WOODS, &c., SENT TO THE MUSEUM
OF THE LITERARY AND HISTORICAL SOCIETY, QUEBEC,
BY H. H. MILES, Esq., LL.D., DECEMBER 26TH, 1871.

J. M. LEMOINE, *Esquire, President of the Literary and Historical Society of Quebec:*

DEAR SIR,—I enclose a list of about 160 specimens of woods, vegetables, fibres, &c., Canadian and foreign, which, with your concurrence, have been sent to the Society's rooms for the purpose of being placed along with corresponding articles in the Museum.

I regret that in a few cases I have been unable to recover the names; but in most instances, both the common and the scientific names have been given and marked on the specimens.

Should arrangements be made in future for receiving into the Museum specimens of raw and manufactured materials, to illustrate various useful manufactures, &c., &c., I have by me a few, which, I think, might be serviceable, and which I should have much pleasure in contributing towards that object.

I remain, dear sir, yours very truly,

H. H. MILES,

Associate Member of the Quebec Literary and Historical Society.
